CC28 DA Transmitter

With display and alarm for flammable gases
CC28 DA Transmitter
With display and alarm for flammable gases

For monitoring combustible gases and vapors in hazardous areas, the CC28 DA transmitter with display, LED alarm lights and buzzer in combination with GfG’s proven gas measurement controllers is a reliable and economical solution. Short response times (t90 ≤ 9 s; depending on gas type and sensor) allow fast warning of gases such as methane or propane.

The design is ATEX certified. With ignition protection types “d” (flameproof enclosure) and “e” (increased safety), safe use in Ex zone 1 is possible. In addition, the CC28 DA hardware complies with the European Functional Safety Standard DIN EN 61508-2: 2011 for many gases.

Communication and service
Signal transmission is based on the 4–20 mA industry standard. Smart Sensor technology enables fast and uncomplicated sensor replacement. Test gas can be added via calibration adapter. If the CC28 DA has to be mounted in a difficult-to-access location, the optional RC2 remote control simplifies adjustment and service (one-man calibration).

Display, pushbuttons and alarm
The CC28 DA has a 2.2 inch LC display and three pushbuttons. In normal operation, the display shows the measured value or information on faults or alarms. In addition, the operating parameters (sample gas, measuring range, limit values, etc.) can be called up via the pushbutton interface. The CC28 DA has highly visible, red LED alarm lights and an integrated, loud buzzer (90 dB). Costs for additional, Ex-protected alarm devices can thus be saved.

Reliable measurement and minimal operating costs
The chimney effect provides rapid detection of combustible gases and vapors. This leaves crucial seconds to initiate countermeasures. The built-in temperature compensation ensures highest measurement accuracy. The low maintenance requirements and long sensor service life keep operating costs to a minimum. Sensor wear is significantly reduced by the automatic shutdown (from 112 % LEL).

Variants for different applications
The basic variant of the CC28 is sufficient for many applications. For special requirements, the CC28 is also available in additional versions:

- **CC28** basic version for a wide range of flammable gases
- **CC28 D** with display to indicate the current measured value
- **CC28 DA** with display, LED warning lights and alarm buzzer

In combination with GfG’s high-performance controllers, all versions of the CC28 are a good choice for a wide range of combustible gases to be monitored.

Overview of gases and SI levels:
- Acetone (C₃H₆O) 2 3
- Acetylene (C₂H₂) 2 3
- Ammonia (NH₃) 2 3
- n-Butane/Isobutane (C₄H₁₀) 2 3
- Diethyl ether (C₄H₁₀O) 2 3
- Natural gas (HC-Gemisch) 2 3
- Ethane (C₂H₆) 2 3
- Ethanol (C₂H₅OH) 2 3
- Ethyl acetate (C₄H₈O₂) 2 3
- Ethylene (C₂H₄) 2 3
- Hexane (C₆H₁₄) 2 3
- Isopropanol (C₃H₈O) 2 3
- Isopropyl alcohol (C₃H₈O) 2 3
- Carbon monoxide (CO) 2 3
- Methane (CH₄) 2 3
- Methanol (CH₄O) 2 3
- n-Nonane (C₉H₂₀) 2 3
- Propane (C₃H₈) 2 3
- Propyne (C₃H₄) 2 3
- Propylene (C₃H₆) 2 3
- Toluene (C₇H₈) 2 3
- Hydrogen (H₂) 2 3

Other gases on request.

**CC28 D Technical data:**
- Measurement method: Catalytic combustion (CC)
- Measuring ranges: 0 to 100 % LEL
- Gas supply: Diffusion or gassing with flow adapter
- Response time: t90 ≤ 9 s
- Lifetime of the sensor: 5 years
- Dimensions: 100 x 168 x 55 mm (W x H x D)
- Weight: 800 g
- Approvals / Certifications: Markings & type of protection: II 2G Ex demb [ib] IIC T4 Gb
- Temperature: -20 to +50 °C (Ex zone)
- Humidity: 5 to 90 % r. h.
- Air pressure: 80 to 120 kPa
- Output signal: 4–20 mA
- Power supply: 15 to 30 V DC
- Housing: Plastic
- Protection class: IP64

1 For ammonia only, ² Depending on operating conditions, ³ Depending on gas type and sensor, ⁴ Depending on sensor
