CO alarm
O2 alarm
Safe LED
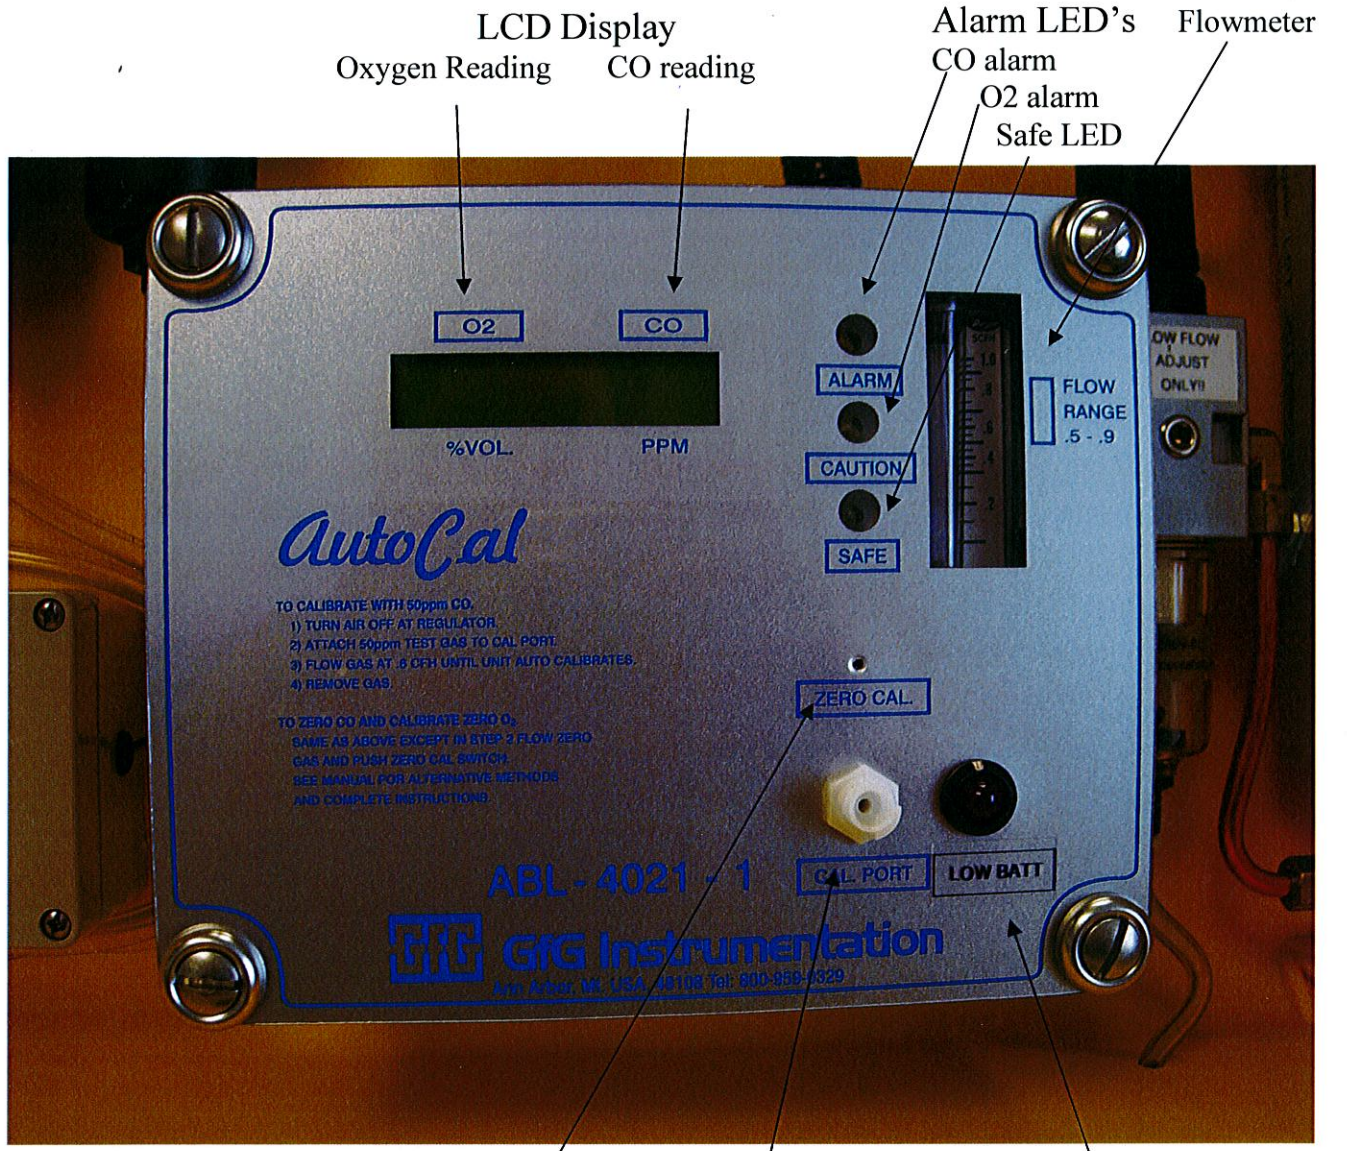

Zero switch   Calibration Port for CO gas   Low battery indicator
(Activate zero)   (Attach cal gas here)   (Indicates low batt
when lit)

Description:

The 9025-XP front panel layout shows O2 and CO values, alarm/low battery indications, air flow, and provides access to the zero button and calibration port. To zero the readings (in clean air) press and relese the zero button. To calibrate with gas, attach calibration gas to the "cal port" and follow the cal instructions. Adjust the flow level using the regulator on the side of the monitor.
